
Academic and Scientific Writing in English

Trainer: Mark Edwards

Duration: 3 days

Language: English

Achieving higher levels of written English

This course examines how to develop powerful focus in your writing – an infallible guide to developing the best structure, and effectively communicating your ideas to your target audience. We look at how to systematically improve the impact, clarity and accuracy of your chosen words. You will receive a toolbox of methods including a range of easily-applied ‘quick tips’ that will improve how seriously your ideas are taken.

You will receive a clear process to follow when approaching an important piece of writing. How to start writing and how to progress through to developing and expressing your ideas, plus you will leave the course with a checklist of conceptual and practical filters to apply to your work to edit and improve your earlier drafts - shaping your writing from ‘good enough’ to ‘exactly fitted to its purpose’.

In this tip-filled seminar, we will examine:

- Appropriate levels of formality
- Tips for writing productivity
- Nailing the problem of structure
- Achieving a good ‘flow’ of ideas and expression
- Achieving impact by careful word choice
- Accuracy in definition
- Describing problems, solutions and outcomes
- Clarity, brevity and style of English
- Presenting data and data commentary
- Understanding the most common mistakes

In this course, the option exists for the participants to spend the second half-day of the course in a writing workshop – examining and editing a short piece of their own writing (500-600 words – for example, an abstract or an extract from the introduction, a key passage or conclusion). This will require the participants to be sent a pre-course briefing during the week preceding the course.
