
Agile Project Management

Trainer: Svenja Neupert

Duration: 2 days

Language: English

How to create successful projects and productive project-teams

Scientific and corporate work-processes are more and more based on project-work with intercultural members.

This needs competences in two areas- project management skills and also the knowledge of how to build a team and to be able to co-operate with a variety of different personalities.

In this seminar we teach you how to combine these two abilities.

Content:

- Basics of project management
- Clear project planning (Classic and agile project management)
- How to manage the information and knowledge-management in a project team in a transparent manner
- Basics of successful team building principles
- Responsibility, cooperation and commitment
- Team communication & information structures
- Recognize potential and assign it to the right role
- How to manage the diversity in a team (culture, gender, working habits, values...)
- Basics of conflict prevention and win-win-oriented conflict resolutions
- Knowledge management – tools & methods

Methods:

The seminar comprises inspirational input, exercises, small group work and group discussion. A lively learning atmosphere is created, and sustainable results obtained.
